HARMFUL EFFECTS OF E-WASTE

- E-waste contains toxic components that are dangerous to human health.
- The negative health effects of these toxins on humans include brain, heart, liver, kidney and skeletal, nervous system damage.

- The toxins leach into the soil and influence the plants and trees.
- Burning of e-waste can release hydrocarbons in the atmosphere, which pollutes the air.
- The toxins can also pollute the groundwater and make animals sick and cause imbalances in the planetary ecosystem.

BASEL CONVENTION-A TREATY THAT CONTROLLED ILLEGAL DUMPING OF E-WASTE

- In 1980s a ship named Khian Sea registered in Liberia was carrying around 14000 tonnes of toxic ash from burning e-waste.
- These wastes were illegally dumped in some less developed countries. It was later found out that around 10,000 tonnes of wastes were dumped in various oceans across the world.

- Another similar incident took place in Nigeria which led to the enforcement of "Basel Convention, 1989" an international treaty designed to reduce the movements of hazardous waste between nations
